

Provide more efficient and flexible Internet Access to your guests with your own Internet Hotspot.

FLEXIBLE

HSC HotSpot offers companies of any size like hotels, hospitals, airports, etc. the opportunity to provide an easy, secure and reasonable broadband internet access to their customers. This service can be billed in a number of ways and integration into existing infrastructure is very simple.

USER-FRIENDLY

Administration of HSC HotSpot is done by a convenient and multilingual web interface. Billing takes place easily either by Voucher or optional directly via a PMS System. The customer welcome page is available in numerous languages and includes terms of use.

Highlights

- ▶ Bandwidth Management per User
Define individual bandwidth restrictions per user
- ▶ Individual Billing
Billing by time, date, data volume, bandwidth or free per user
- ▶ Inhouse Roaming
Allows Internet usage on the room as well as in public areas without additional costs
- ▶ real Plug&Play Engine
No configuration or software installation necessary on end devices
- ▶ Private VLAN Support
Individual billing and bandwidth restriction per VLAN
- ▶ Standard Hardware
Supports standard PC hardware (e.g. HP, FSC, Dell)
- ▶ Operating System and Application
Consists of Linux operating system and billing software including CD Installer
- ▶ HTTP Web Content Filter
Block forbidden web content like porn or violence
- ▶ Logging
Data logging according to EU data retention law (2006/24/EG)
- ▶ PMS Interfaces
Connection to numerous PMS vendors
- ▶ Time-scheduled generation backup
Automatic time-scheduled backup to remote server
- ▶ Automatic Online Update
Keeps your system always up-to-date
- ▶ Easy Integration
Simple integration into existing networks

FUNCTION OVERVIEW

Administration

- ▶ Multilingual Administration via web browser (English, German, Italian, French)

- ▶ Individual Billing (time, date, data volume, bandwidth)
- ▶ Time Rate (time based) and Flat Rate (volume based) billing
- ▶ Pre-Paid and Post-Paid Support
- ▶ Detailed revenue statistics incl. data export (CSV file)
- ▶ Administration of all users incl. current balance
- ▶ Permanent cost control for the customer
- ▶ Automatic Online Update
- ▶ Automatic generation backups (remote backup)
- ▶ Free accessible web pages
- ▶ Define web page BEFORE and AFTER logon
- ▶ Different billing and welcome page per VLAN
- ▶ Inhouse Roaming Support (credit can be consumed e.g. for wireless as well as wired connections without additional costs)

real Plug&Play Connections

- ▶ HSC HotSpot real Plug&Play Engine
- ▶ No configuration or software installation necessary on end devices
- ▶ Supports all common VPN connections (e.g. IPSec, SSL)
- ▶ Automatic Proxy detection

Security

- ▶ Private VLAN Support (room / port isolation)
- ▶ Integrated Stateful-Firewall incl. port- and MAC filter
- ▶ Portforwarding (DNAT) for access to end devices (e.g. Access Point management within Surf-LAN)
- ▶ Advanced HTTP Content Filter
- ▶ SMTP Proxy (Relayhost / Authentication)
- ▶ Advanced Logging of all all relevant actions incl. data export (CSV file)
- ▶ Compliant to EU-Data Retention (2006/24/EG)

Modules

- ▶ Bandwidth restriction per user for Upload and Download
- ▶ Numerous PMS Interfaces (e.g. Micros Fidelio, Protel)
- ▶ Own, open PMS Interface for third party developers
- ▶ Autologon Devices for permanent free internet access
- ▶ Customization of welcome page
- ▶ Connector to ENMS - Central Services (ENMS)

Surfticket Creation

- ▶ Office Printer (DIN A5)
- ▶ PMS Interface
- ▶ Bulk creation (CSV file)
- ▶ Ticket Printer
- ▶ Credit Card

HARDWARE REQUIREMENTS

▶ Number of Users	up to 50 concurrent Users	more than 50 concurrent Users
▶ Processor (x86)	min. 800 MHz	min. 2 GHz
▶ RAM	min. 512 MB	min. 1 GB
▶ Hard Disk (SATA, SAS, IDE, SCSI)	min. 40 GB	min. 40 GB
▶ Network interface (e.g. Intel, 3Com, Realtek)	2 x PCI Ethernet Network Card - 100/1000	2 x PCI Ethernet Network Card - 100/1000

STANDARD
HARDWARE
